Yashaswi G P

Programmer Analyst

SUMMARY

I see challenging opportunities where I can fully use my skills for success of the organization. Results-oriented software engineer with a focus on the design and implementation of full stack applications. Skilled in agile processes, back-end and front-end development

PROFESSIONAL EXPERIENCE

Full Stack Engineer

Jan '23 - Present

Cognizant Technology Solutions

Working as a Full Stack Engineer. Being trained in both front-end and back-end technologies. Working in Java with spring boot framework for back-end and Angular as a front-end framework. Also experienced in AWS and deployment technologies such as Docker and Kubernetes.

EDUCATION

B.E in Computer Science Engineering

Jun '15 - May '17

Srinivas Institute of technology

Mangalore

Graduated with cgpa: 7.5/10

Class 12th Board

Jun '15 - May '17

Alva' s Education Foundation

Mangalore

Graduated with 83.33%

Class 10th Board

Jun '14 - May '15

S.V.S English Medium School

Mangalore

Graduated with 94.04%

PROJECTS

♦ Policy Administration System

It's a full stack application used to issue and manage policies for business based on their business values, property values and the business turn over. It's build using microservices architecture also used JWT authentication and authorization mechanism to secure all exposed end points. The application was also containerized and deployed using AWS components. Technologies: Java, Spring boot, Angular, typescript, SQL, REST API's, HTML, CSS, AWS.

♦ Ambient Reporting (Walmart)

Ambient Reporting application is used to show the reports for how DC's working after Merchandise received from different Vendors.

Roles and Responsibilities:

1. Developed the Average time Widget page to show the data obtained from backend.
2. Access the API information by using Axios and present it in the form of reports according to info API.
3. Access the data base using Big Query and Routing between components like Main component and other Component
4. Facilitated sprint planning, daily scrums, retrospective, stake holders and software demonstration.

Tools and Technologies: VS code, Git, React JS, HTML5, CSS3, JavaScript, React bootstrap, Axios, Context API.
